CYBERSECURITY REVIEW QUESTIONS / 01

SEPARATE NOW FROM THE DESIRED OUTCOME

Use plain language and neutral labels. A team-reported practice is not a verified finding.

A helpful preparation resource from PickYourPro.ai. Fill in digitally or print. Keep your completed copy private.

Outcome A / business purpose in non-sensitive terms / discussion owner role

A / team-reported current practice / statement date or version

A / desired future outcome / question about the difference

Outcome B / business purpose in non-sensitive terms / discussion owner role

B / team-reported current practice / statement date or version

B / desired future outcome / question about the difference

Preparation only. Not a NIST profile, assessment, certification, incident-response plan or access/test authorization. No security guarantee. Keep credentials and technical records private.

CYBERSECURITY REVIEW QUESTIONS / 02

CONNECT RECORD REFERENCES TO REVIEW

Keep records private. Use unavailable, not yet reviewed, or reviewed with an explanation reference.

A / existing supporting-record label / version or date / private custodian role

A / review status / professional clarification question / response reference

A / changed statement or record version / explanation still needed

B / existing supporting-record label / version or date / private custodian role

B / review status / professional clarification question / response reference

B / changed statement or record version / explanation still needed

Preparation only. Not a NIST profile, assessment, certification, incident-response plan or access/test authorization. No security guarantee. Keep credentials and technical records private.

CYBERSECURITY REVIEW QUESTIONS / 03

PREPARE THE UNRESOLVED QUESTIONS

Tick what is organized, not what is secure. A completed box is not assessment evidence.

- [ ] Current and desired statements are separate
- [ ] Each outcome has a stable neutral label
- [ ] Record labels include date or version context
- [ ] Unavailable and unreviewed evidence are distinguished
- [ ] Professional explanations use reference labels
- [ ] Changed statements preserve earlier context
- [ ] No credentials or sensitive technical contents are included
- [ ] No access, test or change authority is implied

Outcome / missing or unreviewed evidence reference / question owner role

Private intake process reference / information excluded from this workbook

Consultation-scope version / open question / response or clarification reference

Preparation only. Not a NIST profile, assessment, certification, incident-response plan or access/test authorization. No security guarantee. Keep credentials and technical records private.

CYBERSECURITY REVIEW QUESTIONS / 04

QUESTIONS FOR THE SECURITY CONSULTANT

Discuss engagement boundaries. This page does not grant permission to test or access systems.

Distinctions: how do you separate our statements, desired outcomes and findings?

Intake: which references help, and what requires an approved private channel?

Uncertainty: how are unavailable and unreviewed evidence recorded?

Traceability: how do explanations link to outcomes, versions and open questions?

Services: what assessment, planning, implementation and verification are separate?

Terms: what scope, authorization, deliverables, fees and change process apply?

Preparation only. Not a NIST profile, assessment, certification, incident-response plan or access/test authorization. No security guarantee. Keep credentials and technical records private.

CYBERSECURITY REVIEW QUESTIONS / 05

COMPARE REVIEW AND FOLLOW-ON SERVICES

Use Consultant A and B against the same outcome list. Do not compare broad protection promises.

Consultant A / B / proposal dates / common outcome-list version

Current-practice review, evidence gaps and desired-outcome discussion - A / B

Implementation and later verification: included, separate or excluded - A / B

Private intake, deliverables, boundaries, fees and unresolved questions - A / B

READY TO HEAR FROM PROS?

Create an account on PickYourPro.ai if you choose, then start a Cybersecurity request. Share a non-sensitive description of the consultation you seek so participating pros can compete with proposals. Compare review scope, deliverables, separate implementation or verification work and written terms. Keep technical records and confidential findings in approved private channels.

One request. Every pro's best offer.

Start a request

Participation varies. A private intake and scope review may be needed before a final proposal.
