DRAINAGE / 01

RECORD WHAT YOU ALREADY NOTICED

Use existing observations only. Repeat for more events; do not investigate or recreate conditions.

A helpful preparation resource from PickYourPro.ai. Fill in digitally or print. Keep your completed copy private.

Area A / Event 1: date or unknown / ordinary weather context already known

Event 1: what I noticed in my own words / existing private photo or record reference

Area A / Event 2: date or unknown / ordinary weather context already known

Event 2: what I noticed / existing record reference / question about the same area

Area B / Event 3: date, known context and observation / existing record reference

Which details are unknown, and what do I want the professional to clarify?

Preparation only. Not diagnosis, design, testing, water-entry, repair, safety, discharge permission or legal advice. Use existing observations only. Keep private site details out.

DRAINAGE / 02

LINK EVENTS TO PROVIDER RESPONSES

Keep observations, explanations and proposed investigation separate. A note is not a diagnosis.

Area / event label: my question / provider role / conversation date

Provider explanation reference / what remains uncertain / follow-up owner

Second area / event label: my question / provider role / conversation date

Second response reference / what remains uncertain / follow-up owner

Proposed assessment or other professional input / written scope reference / exclusions

Later observation already made / original area label / question to reopen

Preparation only. Not diagnosis, design, testing, water-entry, repair, safety, discharge permission or legal advice. Use existing observations only. Keep private site details out.

DRAINAGE / 03

KEEP OPEN QUESTIONS VISIBLE

Tick what is organized. Do not treat these checks as a safety or performance assessment.

- [ ] Area and event labels are consistent
- [ ] Dates and unknowns are recorded honestly
- [ ] Existing observations are separate from assumptions
- [ ] Private photos and records remain separate
- [ ] Provider replies point to the original question
- [ ] Proposed assessment has a written scope reference
- [ ] Outside-scope questions have a professional contact role
- [ ] Handoff documents and unresolved items are tracked

Source, outlet or other-system question / professional to clarify / response reference

Written findings or handoff document / date received / missing information

Later concern / original area and event label / next conversation owner

Preparation only. Not diagnosis, design, testing, water-entry, repair, safety, discharge permission or legal advice. Use existing observations only. Keep private site details out.

DRAINAGE / 04

QUESTIONS FOR THE DRAINAGE PRO

Ask for professional assessment and a clear record. Do not use this page to select a design.

Evidence: what is known, assumed or still unverified?

Assessment: what needs a site visit or other professional input?

References: how will answers point back to my area and event labels?

Boundaries: who handles source, outlet and other-system questions?

Records: what findings, limitations and handoff information will I receive?

Follow-up: how are later concerns, changed scope and written terms handled?

Preparation only. Not diagnosis, design, testing, water-entry, repair, safety, discharge permission or legal advice. Use existing observations only. Keep private site details out.

DRAINAGE / 05

COMPARE THE SAME OBSERVATIONS

Use Provider A and B in each box. Compare the assessment offered, not a promised result.

Provider A / B / discussion dates / shared area and event list

Assessment scope, written findings and unresolved questions - A / B

Other-professional coordination, exclusions and handoff records - A / B

Follow-up, timing, fee terms and questions still to clarify - A / B

READY TO HEAR FROM PROS?

Create an account on PickYourPro.ai if you choose, then start a Drainage request. Share a non-sensitive summary of the observations you want assessed so participating pros can compete with proposals. Compare assessment scope, written findings, exclusions, timing and terms. A professional site review may be needed.

Start a request

One request. Every pro's best offer.

Participation varies. A professional site and records review may be needed before confirming scope.
