QUESTIONS FOR THE FLOORING PRO

Ask how the provider will connect your selection and boundary questions to a written scope.

Product: how do sample preferences become a confirmed product specification?

Edges: what treatment and exclusions are proposed for E1, E2 and other boundaries?

Assessment: what remains unknown before removal and how is extra work discussed?

Substitution: which rooms, edges and written records must be reconsidered?

Roles: who handles removal, furniture coordination, adjacent work and handover?

Terms: how are changes, timing, payment terms, care records and open items documented?

Preparation only. Not product selection, measuring, installation, site diagnosis, safety, warranty or legal advice. No suitability or work authorization. Keep private site details out.
