RV REPAIR / 01

MAP THE RV AND COMPONENT QUESTIONS

Use existing information only. Do not inspect, operate, move or test anything for this workbook.

A helpful preparation resource from PickYourPro.ai. Fill in digitally or print. Keep your completed copy private.

RV A: broad RV type / model information already known / question to discuss

Coach concern: label / existing observation or record / provider to ask

Chassis concern, if applicable: label / existing information / boundary to confirm

Component 1: general label / concern / identity question for the provider

Component 2: general label / concern / identity question for the provider

Unclear boundary: what I cannot place / who will clarify / reply needed

Preparation only. Not diagnosis, repair, operating or transport instructions, compatibility or warranty advice, roadworthiness or occupancy clearance, emergency or legal guidance. Keep identifiers private.

RV REPAIR / 02

CONNECT RECORDS TO RESPONSIBILITY

A document reference is not a diagnosis. Let the professional confirm its relevance before relying on it.

Document 1: source or manual label / concern linked / relevance not yet confirmed

Document 2: prior-work or modification record / concern linked / missing context

Provider A: concerns accepted for review / exclusions / written scope reference

Provider B or referral: question sent / response / work accepted or still unconfirmed

Investigation stage: responsible provider / expected findings / next discussion

Access and finish restoration: included work / responsible provider / unresolved boundary

Preparation only. Not diagnosis, repair, operating or transport instructions, compatibility or warranty advice, roadworthiness or occupancy clearance, emergency or legal guidance. Keep identifiers private.

RV REPAIR / 03

KEEP THE HANDOFF CONNECTED

Tick what is discussed, not a declaration that the RV is safe, repaired or ready for use.

- [ ] Coach, chassis and component questions have separate labels
- [ ] Record references come from information already available
- [ ] Uncertain document matches remain marked for confirmation
- [ ] Each provider's accepted scope and exclusions are recorded
- [ ] Investigation and later repair decisions are separate
- [ ] Access-related work and finish restoration roles are discussed
- [ ] Referral acceptance is confirmed rather than assumed
- [ ] Completion records and unresolved concerns use the same labels

Concern label / work reported complete / completion-record reference / question

Deferred or referred concern / provider explanation / next contact and reply

Documents received or missing / private handoff arranged / follow-up owner

Preparation only. Not diagnosis, repair, operating or transport instructions, compatibility or warranty advice, roadworthiness or occupancy clearance, emergency or legal guidance. Keep identifiers private.

RV REPAIR / 04

QUESTIONS FOR AN RV REPAIR PROVIDER

Use one concern list in each conversation. Record the provider's answer without interpreting technical findings.

Responsibility: which coach, chassis and component concerns do you handle or refer?

Records: who confirms the relevant identities and current manufacturer documents?

Investigation: what findings will we receive before discussing repair work?

Restoration: who handles access-related work, finishes, exclusions and changes?

Referral: who passes the question on and confirms the next provider's acceptance?

Handoff: what records, unresolved-item notes, written terms and follow-up apply?

Preparation only. Not diagnosis, repair, operating or transport instructions, compatibility or warranty advice, roadworthiness or occupancy clearance, emergency or legal guidance. Keep identifiers private.

RV REPAIR / 05

COMPARE THE RESPONSIBILITY MAP

Use A and B for providers. Compare the same labelled concerns and explain gaps between their scopes.

Provider A / B / dates / common RV and concern-list version

Coach, chassis and component scope / referrals / record review - A / B

Investigation, access-related work, restoration and change process - A / B

Completion records, unresolved items, follow-up and written proposal - A / B

READY TO HEAR FROM PROS?

Create an account on PickYourPro.ai if you choose, then start an RV Repair request. Share non-sensitive concerns and responsibility questions so participating pros can compete with proposals. Compare scope, coordination, records, terms and fit. Keep private identifiers out.

One request. Every pro's best offer.

Start a request

Participation varies. A professional assessment and record review may be needed before a final repair proposal.
