METAL FABRICATION / 01

CONNECT ITEMS AND DRAWING VERSIONS

Reference existing information. Professionals must confirm design, dimensions and suitability.

A helpful preparation resource from PickYourPro.ai. Fill in digitally or print. Keep your completed copy private.

Item A: general description / intended use / question for professional review

Item B: general description / intended use / question for professional review

Drawing 1: document reference / revision / item labels it concerns

Another drawing or sketch: reference / revision / difference to clarify

Responsible design and field-verification roles / confirmation still needed

Missing or conflicting information / item label / person to answer

Preparation only. Not welding, cutting, measuring, repair, lifting, anchoring, engineering, coating, inspection, code, safety or legal guidance. Professional review and original approvals remain separate.

METAL FABRICATION / 02

LINK SAMPLES AND RELEASE REFERENCES

These notes do not approve a design, certify a finish or authorize production.

Sample A: finish or appearance reference / related item / drawing version

Sample B or alternative: reference / difference to discuss / item label

Professional suitability question / sample or drawing reference / reply owner

Controlling revision: professional confirmation reference / related items

Original review or production-release record / exact revision / open question

Later change: item / revised document or sample / new review reference

Preparation only. Not welding, cutting, measuring, repair, lifting, anchoring, engineering, coating, inspection, code, safety or legal guidance. Professional review and original approvals remain separate.

METAL FABRICATION / 03

TRACK DELIVERY AND INSTALLATION HANDOFF

Tick what is clear. Delivery, installation and professional acceptance are separate records.

- [ ] Item labels connect to the relevant drawing revisions
- [ ] Finish references identify the item and version
- [ ] Professional design and verification duties are named
- [ ] Original release records remain separate from these notes
- [ ] Fabrication, delivery and installation are distinguished
- [ ] Work by others and exclusions are visible
- [ ] Reported differences route to the responsible professional
- [ ] Final records and follow-up contacts are agreed

Delivery: item labels / provider record / missing or different item question

Installation or work by others: agreed boundary / receiving role / open item

Finish concern or unresolved item / provider reply / promised final record

Preparation only. Not welding, cutting, measuring, repair, lifting, anchoring, engineering, coating, inspection, code, safety or legal guidance. Professional review and original approvals remain separate.

METAL FABRICATION / 04

QUESTIONS FOR THE FABRICATION PROVIDER

Use the same item and reference list with every provider. Do not infer technical approval.

Basis: who confirms design, dimensions and the controlling revision?

Changes: how do item, drawing and sample references stay aligned?

Release: what professional review and original authorization apply?

Delivery: what fabrication, transport, installation and exclusions are included?

Exceptions: how are delivery, finish or installation questions routed?

Handoff: which final records, checks, care documents and terms are included?

Preparation only. Not welding, cutting, measuring, repair, lifting, anchoring, engineering, coating, inspection, code, safety or legal guidance. Professional review and original approvals remain separate.

METAL FABRICATION / 05

COMPARE THE SAME METALWORK BRIEF

Use A and B for providers. Clarify document-version differences before comparing proposals.

Provider A / B / proposal dates / common item and document list

Design, verification, revisions, sample review and release duties - A / B

Fabrication, delivery, installation and work-by-others boundaries - A / B

Exception handling, final records, care, written terms and open items - A / B

READY TO HEAR FROM PROS?

Create an account on PickYourPro.ai if you choose, then start a welding and metal-fabrication request. Share non-sensitive item goals so participating pros can compete with proposals. Compare professional responsibilities, deliverables, installation boundaries, terms and fit.

One request. Every pro's best offer.

Start a request

Participation varies. A professional drawing, site and responsibility review may be needed before a final proposal.
