KEEP THE INSTALLER'S REPLY SEPARATE

An explanation is not your own diagnosis. Keep uncertain causes and unarranged reviews visible.

O1 / later observation or reply / date / unresolved follow-up question

CONNECT THE DOCUMENTS AND OPEN ITEMS

Tick organized items. A received document does not establish warranty coverage or resolve an observation.

- [ ] Pane and observation labels remain consistent
- [ ] Dates and existing photo references are recorded
- [ ] My observation and the installer reply stay separate
- [ ] Uncertain film or glass questions remain open
- [ ] Review status does not imply a completed remedy
- [ ] Later observations link to the original item
- [ ] Product and workmanship documents are separate
- [ ] No technical tests, legal limits or private identifiers are included

Appearance-review and care information / installer-provided title, version and date

Product document / workmanship document / separate contact roles to clarify

Open item / linked pane and observation / reply owner / response reference

Preparation only. Not inspection, diagnosis, repair, care, curing, measurement, warranty or legal instructions. No driving clearance or appearance guarantee. Keep vehicle identifiers private.

QUESTIONS FOR THE TINT INSTALLER

Ask about the same observations and references. Record the reply, not a promised result.

Labels: how should panes and observations be identified in your replies?

Review: what is proposed, and what film or glass questions remain uncertain?

References: which appearance-review and care documents and versions apply?

Findings: how are explanations, open questions and separate work recorded?

Follow-up: who receives later observations and connects them to this review?

Terms: what product, workmanship, follow-up and exclusion documents apply?

Preparation only. Not inspection, diagnosis, repair, care, curing, measurement, warranty or legal instructions. No driving clearance or appearance guarantee. Keep vehicle identifiers private.

COMPARE THE SAME FOLLOW-UP QUESTIONS

Use Installer A and B. A review proposal is separate from proposed remedial work.

Installer A / B / discussion dates / common pane-and-observation list

Initial assessment scope, explanation records and exclusions - A / B

Follow-up, later observations and separately proposed work - A / B

Document references, contact roles, timing, fees and written terms - A / B
